

Submission Worksheet

Submission Data

Course: IT202-007-F2025

Assignment: IT202 PHP Problems

Student: Roshan T. (rt524)

Status: Submitted | **Worksheet Progress:** 100+%

Potential Grade: 11.00/10.00 (110.00%)

Received Grade: 0.00/10.00 (0.00%)

Started: 9/29/2025 8:59:56 PM

Updated: 9/29/2025 9:51:25 PM

Grading Link: <https://learn.ethereallab.app/assignment/v3/IT202-007-F2025/it202-php-problems/grading/rt524>

View Link: <https://learn.ethereallab.app/assignment/v3/IT202-007-F2025/it202-php-problems/view/rt524>

Instructions

- Overview Link: <https://youtu.be/iwA6vyRPhoM>
- 1. Ensure you read all instructions and objectives before starting.
- 2. Create a new branch from dev called M2-Homework
 - 1. `git checkout dev` (ensure proper starting branch)
 - 2. `git pull origin dev` (ensure history is up to date)
 - 3. `git checkout -b M2-Homework` (create and switch to branch)
- 3. Copy the template code from here: [GitHub Repository - M2 Homework](#)
 - It includes Problems 1-4 and `base.php`. Put all into an M2 folder or similar inside your `public_html`
 - Immediately record to history
 - `git add public_html`
 - `git commit -m "adding M2 HW baseline files"`
 - `git push origin M2-Homework`
 - Create a Pull Request from M2-Homework to dev and keep it open
- 4. Fill out the below worksheet
 - Each Problem requires the following as you work
 - Ensure there's a comment with your UCID, date, and brief summary of how the problem was solved
 - Initial outline/plan of how you'll solve it via comments (add/commit after this stage)
 - Code solution (add/commit periodically as needed)
- 5. Once finished, click "Submit and Export"
- 6. Locally add the generated PDF to a folder of your choosing inside your repository folder and move it to Github
 - 1. `git add .`
 - 2. `git commit -m "adding PDF"`
 - 3. `git push origin M2-Homework`
 - 4. On Github merge the pull request from M2-Homework to dev
 - 5. On Github create a pull request from dev to prod and immediately merge. (This will trigger the prod deploy to make the heroku prod links work)
- 7. Upload the same PDF to Canvas
- 8. Sync Local

1. git checkout dev
2. git pull origin dev

Section #1: (2 pts.) Problem 1 - Odds

Progress: 100%

≡ Task #1 (2 pts.) - Edit the `printOdds` function to output odd values of the array

Progress: 100%

Details:

- Only make edits where noted via provided comments
- Challenge: Print odd values only in a single line separated by commas
- Step 1: sketch out plan using comments (include ucid and date)
- Step 2: Add/commit your outline of comments (required for full credit)
- Step 3: Add code to solve the problem (add/commit as needed)

Part 1:

Progress: 100%

Details:

Two screenshots are expected

1. Snippet of relevant code showing solution (with ucid/date comment)
2. Full output of executing the program (visit the proper file on Heroku dev after a manual deploy)

```
Running Problem 1 for [r524] [2025-09-30 00:58:12]
Challenge: Print out only odd values in a single line separated by commas

Problem 1:
Original Array: 6, 1, 3, 5, 4, 2, 6, 7, 8, 5
Output Array: 1, 3, 5, 7, 5
Problem 2:
Original Array: 6, 6, 7, 6, 3, 4, 5, 3, 1, 6
Output Array: 7, 3, 3, 1, 1
Problem 3:
Original Array: 6, 6, 1, 1, 7, 7, 3, 3, 4, 4, 5, 5, 6, 6, 7, 7, 8, 8, 5, 5
Output Array: 1, 1, 3, 3, 5, 5, 7, 7, 7, 7
Problem 4:
Original Array: 6, 6, 6, 6, 7, 7, 6, 6, 4, 4, 5, 5, 3, 3, 1, 1, 6, 6
Output Array: 7, 7, 7, 7, 5, 5, 3, 3, 1, 1
```

heroku output problem 1

```
function printOdds(array, arrayNumber) {
  // ONLY MAKE EDITS BETWEEN THE DESIGNATED "START" AND "END" COMMENTS
  START_EDIT_HERE(array, arrayNumber);

  // Challenge: Print odd values only in a single line separated by commas
  // Step 1: Sketch out plan using comments. (Include ucid and date)
  // Step 2: Add/commit your outline of comments (required for full credit)
  // Step 3: Add code to solve the problem (add/commit as needed)

  // Output Array: []
  // Given Solution Path:
  // 1. Create an empty array, and if from 0 to arr.length - 1, print and append comma
  // 2. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 3. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 4. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 5. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 6. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 7. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 8. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 9. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 10. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 11. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 12. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 13. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 14. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 15. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 16. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 17. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 18. Loop through array, and if from 0 to arr.length - 1, print and append comma
  // 19. Loop through array, and if from 0 to arr.length - 1, print and append comma

Part 3:

Progress: 100%

Details:

Briefly explain `how` the code solves the challenge (note: this isn't the same as `what` the code does)

Your Response:

Solved by iterating through the array and if the number is odd ($\text{num} \bmod 2 \neq 0$), prints the number out

Saved: 9/29/2025 9:15:41 PM

Section #2: (2 pts.) Problem 2 - Sum

Progress: 100%

Task #1 (2 pts.) - Edit the `sumValues` function to sum the array values and present them in a format with exactly two decimal places

Progress: 100%

Details:

- Only make edits where noted via provided comments
- Challenge 1: Sum all the values of the passed in array and assign to `total`
- Challenge 2: Have the sum be represented as a number with exactly 2 decimal
- Example: 0.1 would be shown as 0.10, 1 would be shown as 1.00, etc
- Step 1: sketch out plan using comments (includeucid and date)
- Step 2: Add/commit your outline of comments (required for full credit)
- Step 3: Add code to solve the problem (add/commit as needed)

Part 1:

Progress: 100%

Details:

Two screenshots are expected

1. Snippet of relevant code showing solution (with ucid/date comment)
2. Full output of executing the program (visit the proper file on Heroku dev after a manual deploy)

⇒ Part 3:

Progress: 100%

Details:

Briefly explain `how` the code solves the challenges (note: this isn't the same as `what` the code does)

Your Response:

For getting the sum, repeatedly increment the total based on the value in the array from a for loop. To always achieve 2 decimal places, the number is first multiplied to 100 and rounded if the last digit is over 5. It is then truncated through casting and always kept to a length of 2 decimal places

Section #3: (2 pts.) Problem 3 - Conversion

Progress: 100%

≡ Task #1 (2 pts.) - Edit the ``bePositive`` function to make each value positive, convert it back to the original data type, and set it to the proper slot in the ``output`` array

Progress: 100%

Details:

- Only make edits where noted via provided comments
- Challenge 1: Make each value positive
- Challenge 2: Convert the values back to their original data type and assign it to the proper slot of the `output` array
- Step 1: sketch out plan using comments (include uuid and date)
- Step 2: Add/commit your outline of comments (required for full credit)

Section #4: (2 pts.) Problem 4 - Strings

Progress: 100%

≡ Task #1 (2 pts.) - Edit the `transformText` function to solve the challenges

Progress: 100%

Details:

- Only make edits where noted via provided comments
- Challenge 1: Remove non-alphanumeric characters except spaces
- Challenge 2: Convert text to Title Case
- Challenge 3: Trim leading/trailing spaces and remove duplicate spaces
- Result 1-3: Assign final phrase to `placeholderForModifiedPhrase`
- Step 1: sketch out plan using comments (include uuid and date)
- Step 2: Add/commit your outline of comments (required for full credit)
- Step 3: Add code to solve the problem (add/commit as needed)

🖼 Part 1:

Progress: 100%

Details:

Two screenshots are expected

1. Snippet of relevant code showing solution (with uuid/date comment)

deploy)

part 1 code snippet of problem 4 solution (code too long for 1 ss)

part 2 of code snippet of problem 4 solution

part 1 heroku output of problem 4 (too long for 1 ss)

part 2 of heroku output of problem 4

Details:

- Direct link to the file in the homework related branch from Github (should end in `.php`)
- Direct link to the file on Heroku Prod (visit the proper file on Heroku dev after a manual deploy)

Part 3:**Details:**

Briefly explain `how` the code solves the challenges (note: this isn't the same as `what` the code does)

Your Response:

firstly iterates through each char of text to check if it is alphanumeric and changes the phrase accordingly. then, strips leading and trailing whitespaces with `trim()`. for middle duplicate whitespaces, replaces any whitespaces or consecutive whitespaces with a single whitespace for title case, capitalized the first letter and every letter after a space, with the rest of the letters being forced lowercase

 Saved: 9/29/2025 9:40:14 PM

Task #2 (+ 1 pt.) - Edit the `transformText` function to solve the extra credit challenge (challenge 4)

Details:

- Only make edits where noted via provided comments
- Challenge 4: Extract middle 3 characters (beginning starts at middle of phrase)
- Assign result to 'placeholderForMiddleCharacters'
- If not enough characters assign "Not enough characters"
- Step 1: sketch out plan using comments (include uuid and date)
- Step 2: Add/commit your outline of comments (required for full credit)

- Step 2: Add/commit your code with comments for full credit
- Step 3: Add code to solve the problem (add/commit as needed)

Part 1:

Progress: 100%

Details:

Saved: 9/29/2025 9:44:01 PM

Part 2:

Details:

Briefly explain **how** the code solves the extra credit challenge (note: this isn't the same as **what** the code does)

Your Response:

for the special case of 4 characters, returns middle 2 characters with division and int casting.
then, for all other lengths, returns middle character and character before and after as the middle characters of that string. otherwise, return that it is too short

Task #3 (0.67 pts.) - Reflection

Progress: 100%

Task #1 (0.33 pts.) - What did you learn?

⇒ Task #1 (0.33 pts.) - What did you learn?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

I learned that PHP is somewhat similar to Python in the sense of string methods and overall how high level the language is compared to something a little more complex like C++. I also got more familiar with the process of git and github through the vscode terminal, as well as how pull requests track commits and changes made.

Saved: 9/29/2025 9:49:38 PM

⇒ Task #2 (0.33 pts.) - What was the easiest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

The easiest part was problem 1 and other parts where we had to differentiate between even and odd. Another part that was easy was finding the absolute value of a number while retaining its original data type by casting and returning.

Saved: 9/29/2025 9:50:45 PM

⇒ Task #3 (0.33 pts.) - What was the hardest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

The hardest part of this assignment so far was getting used to the submission and making sure to keep track of all changes with commits. Although it was difficult this time, I now have a good understanding of how to go about the

process and should take much less time.
